DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 7-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Williams (2004/0100581).

Regarding claim 7, Williams discloses a step of store pre-produced video (105), which meets the claimed pre-producing step, a step of identifying and store insertion point (110), which meets the claimed creating a memory object, a plurality of insertion points (paragraph 0016), which meets the repeating step as claimed, and a combining step (120), which meets the producing step as claimed. The combining step 120 is implemented by a computer program as described in paragraph 0022. The computer program inherently includes the claimed desired sequence of scenes in order to generate the combined images with different insertion coordinates.

Regarding claims 8 and 9, the alterable of the computer program in Williams meets the altering step as claimed.

Allowable Subject Matter

3. Claim 1-6, 10-17 are allowed.
